THE MONTPELLIER RANGE
OF METAL LEAF DECORATION FOR GLASS

Verre Eglomisé has been used for generations to create a reflective surface on glass by using variations of metal leaf to create different effects.

The process involves laying gold, silver or copper leaf in different ways onto the surface of the glass, which can also then be engraved and painted or used to back up as design on the front of the glass.

The resulting effect can be used for decorative purposes, or to create a unique piece of art.

windsorglass.com

Verre églomisé is a French term referring to the process of applying both a design and gilding onto the rear face of glass to produce a mirror finish. The name is derived from the 18th-century French decorator and art-dealer Jean-Baptiste Glomy, who was responsible for its revival.
