

WINDSOR GLASS

ENVIRONMENTAL AND SUSTAINABILITY POLICY

Windsor Glass are committed to producing the highest quality product without damaging the environment for future generations. Concerns for the environment are important to us and necessary for the future of our business and the planet.

Our aim is to reduce our waste product and energy consumption and recycle as much as we can.

OUR ENVIRONMENTAL/SUSTAINABILITY ACTION PLAN

Our role as a company is to make sure that we reduce the damage to the environment. As a small company we do not produce a lot of waste and we actively try to recycle everything we can.

WE RECYCLE:

- All glass waste
- We have installed energy efficient lighting in our factory and offices
- We have installed an energy efficient heater for the factory
- All the water used by our machines is reused
- We have installed new more energy efficient machinery
- All our electricity is from a renewable source

ACTIONS

Windsor glass is actively and constantly trying to find more efficient manufacturing systems to reduce our use of water and electricity. We understand that this is an ongoing process and closely regulate our waste product. We ensure that all our machinery, lighting, heating and computers are all turned off at night.

Windsor Glass are committed to the environment we work in. We are fortunate to work in a green environment with the River Thames on our doorstep and, we are determined to keep it this way.
